In 2024 to 2025, Give Hope Relief received total income of £2,534.54.

We spent £2,050 directly on charitable activities in Bangladesh, focusing on impoverished communities facing severe hardship and limited access to basic services. A significant part of our work addressed the lack of clean water, where households relied on unsafe sources. We funded water wells to improve reliable access to clean water, distributed food packs to families struggling with food insecurity, and provided Zakat cash assistance to those in acute need. These activities were aimed at supporting vulnerable individuals and families and were carried out in line with our charitable objectives.
