Street Angels York Annual Report – year ending 31st August 2026

This report covers 1st September 2025 to 31st August 2026.

A successful year for Street Angels York. We have provided shifts every month during this period generally covering 5 shifts each month on Friday or Saturday nights.

Volunteer numbers are lower than we would like, however, they are gradually climbing following an increased presence on Face Book. We have provided development for a number of angels to become leaders to support the provision of additional shifts now volunteer numbers are starting to climb. We also have a new volunteer seamstress to carry out repairs to our coats.

Training opportunities for the team have included Homelessness Provision provided by City of York Council, Conflict Management provided by North Yorkshire Police, Throw Line Training provided by the RNLI and an awareness visit to the CCTV camera room, as well as a briefing note dealing with an Autism Meltdown. We appreciate these organisations giving their time to support the development of our angels.

We continue to support safety awareness initiatives at some of the Universities and Colleges and one school. We have made a new connection with a new school as part of their Interfaith Day. We also continue to maintain two defibrillators based in York City Centre for public use. Other activities include attending talks with various organisations to raise awareness of our work.

Following the appointment of a volunteer to take the lead on our social media presence on Face Book we have seen an increase in expressions of interest in volunteering and awareness of our services.

Attending the local partnership briefings, organised by the police, continue to be productive and we took part in a pilot of a safe haven for the night time economy. We also continue to have good working relationships with other partners and venues in the City and we supported the successful re-assessment for the Purple Flag status in February 2026.

Our financial situation is healthy (see submitted accounts) with our income coming primarily from donations and grants. There have not been any significant purchases other than normal operating expenditure for items such as DBS applications, flip flops etc. We do need to take into account that our bank account now charges us per transaction.

We thank those who support our work through donations, volunteering their time or donation of resources.
