Hedgehog Rescue of Hazelbury Bryan annual report.

This year we welcomed a new trustee, Lisa Housner to join our happy band.

The Hedgehog Rescue of Hazelbury Bryan has achieved so much this year to improve the care we give to our hedgehogs, the environment in which we give that care and the information we give to the general public.

The new incubators are now in full use and have been occupied since purchase with sick hedgehogs nursed in the intensive care area of the rescue.

The floor was coated with a layer of resin which is easier to clean and more hygienic. It now looks bright and shiny.

We have been fundraising for some sanctuary pods in the garden to protect the hedgehogs that are well enough to live outside but not to live in the wild yet. We have managed to purchase two but still would like a third to enable us to maximise the space we have for the sanctuary area.

Last year 2025-2026, we released a fantastic 84 % of our hedgehogs back into the wild. We are incredibly proud of that statistic.
