THE FARINGDON FOLLY TOWER TRUST

FOR THE YEAR TO 31ST DECEMBER 2025

Trustee's Report

Phase two of the planned essential repairs continued to be the primary focus in 2025; and the 16-week programme of repairs will now be starting in the spring of 2026. However, because there was a still a chance that repairs could start earlier - the usual series of twice-monthly open days was concertina'd into three months - but opening every Sunday. As a result, the income was only slightly down compared to previous years. The woodland continues to be developed sympathetically for the enjoyment of all; and the highlight of the year were the 90th birthday celebrations of the Tower in November.
