

Sharing Christ in Romania Annual report 2024.

We visited Romania once this year during September for two weeks, again visiting Christian Orphanages, widows, churches, helping with various aspects and needs. We noticed that much of our purchases were much more expensive, due to the situation worldwide.

We had a total spend this year of over £40,000 and had a terrific visit, bringing relief to many widows, family's orphanages and various building projects this year.

We again bought winter tyres for vehicles, these vehicles are used to distribute the food, potatoes, and equipment we buy, to the villages etc.

This year we purchased 9 tons of potatoes, for various orphanages and old people's homes, and also some for-home visits of widows, and under-privileged families.

We were able to help with some repairs to homes, where people had holes in their roofs to try and stop the rain coming in, this will be quite a relief for these families.

We were able to travel into Ukraine, and financially help a few projects there. We again visited the Republic of Moldova, one charity being a Sunday school for village and street children, they have between 500 and 600 children each week, the children get breakfast, and lunch before traveling home, we gave them £1000. We also left some money for another charity, who work with poor families and street people.

We visited the Metro many times to buy food for making up food bags for the people in the villages, and had a spend of over £8000 for food.

We again helped some people with medical expenses, some who were rather unwell, and helped with medication for some rather ill people.

Our visit was very busy, early mornings and late evenings, but feel that the visit was very fruitful.
