

## **2022 Annual Charity Report – NIC103139**

2022 was a very lean period for the historical society in which there was little or no activity meetings taking place during the year partly due to the Covid restrictions; and society members wishing to remain isolated.

There was continued online research carried out by society individuals into our various ongoing projects.

We resumed “normal business” after the total lifting of the Covid restrictions, but were respectful of the wishes of others and as such we did not carry out any displays or provide local groups with any presentations of our past and present work.

We, as a society, are looking forward to the total resumption of getting together and creating results as we did prior to the Covid pandemic.
