Annual Report:

Unfortunately, we continually find it a great challenge as a team to be continually developing the Web site making it relevant to the needs of those around the world who use it.

The challenges that we faced last year are still the same challenges that we are facing this year.

This incoming year there are a few challenges that we face.

1. The need to look at the Home page of the web site and change its form, bringing it into a more modern presentation to the younger generation who use it. Unfortunately that may not be possible as the costs would be prohibited, we continue to reflect on other ways of achieving our goals.
2. The level of content is still excellent but we need to spend considerable amount of time on completing introductions to the 66 books of the Bible.
3. The start of developing an understanding of other religions is in need of immediate attention. This may not happen in the incoming year but we do hope that it will begin in 2024.
4. The church history section also needs a serious amount of attention in the incoming year and the hope is that the first 400 years of the church can be documented during 2023 and 2024.
5. The translation of the Main part of the site which has been translated into Bahasa Indonesia has been received well in Indonesia and we are pleased about that advancement.
6. We will be looking at the use of video on the site and hope to make and introduce opportunity for those using the site to watch and listen to the teaching we produce through this medium. This is simply not possible at present and we may have to have a rethink on this matter.
7. We will be looking to replace some of our retiring Trustees with a number of younger men and women who have the vision, desire and ability to develop this medium of delivering Christian Teaching. As yet we have no one with the desire to offer the level of time into developing and editing site materials, but we will keep looking.

In general we are happy with the obvious usefulness of the site across the world but also aware that much ground has yet to be covered.

This report is presented by the Editor.
