2.4 Income and Endowments (Continued)

(ii) Other Income

Other income is recognised in the Statement of Financial Activities where there is entitlement, certainty of receipt and the amount can be measured with sufficient reliability.

2.5 Expenditure

Expenditure is recognised when a liability is incurred. Contractual arrangements and performance related grants are recognised as goods and services are supplied. Where costs cannot be directly attributed to a particular heading, they have been allocated to activities on a basis consistent with use of resources. Staff costs and overhead expenses are allocated to activities on the basis of staff time spent on those activities.

(i) Charitable Activities

This comprises all the resources applied by the charitable company in undertaking its work to meet its charitable objectives. Charitable activities will include the costs of governance arrangements which relate to the general running of the charitable company.

2.6 Fund Accounting

The charitable company has two types of funds for which it is responsible at the year-end:

Land and Buildings	2% Straight Line

**NOTES TO THE FINANCIAL STATEMENTS (Continued)

2. ACCOUNTING POLICIES (Continued)

2.9 Trade and Other Payables

Trade and other payables are initially recognised at fair value and thereafter stated at cost.

2.10 Taxation

As a charity, the charitable company is not liable to Corporation Tax.

2.11 Cash and Cash Equivalents

Cash and cash equivalents include cash in hand, deposits held at call with banks, other short term highly liquid investments with original maturities of three months or less.

2.12 Financial Instruments

(i) Financial assets

Basic financial assets, including trade and other receivables, cash and bank balances and amounts owed by related parties and are initially recognised at transaction price, unless the arrangement constitutes a financing transaction, where the transaction is measured at the present value of the future receipts discounted at a market rate of interest. Such assets are subsequently carried at amortised cost using the effective interest method.

At the end of each reporting period financial assets measured at amortised cost are assessed for objective evidence of impairment. If an asset is impaired the impairment loss is the difference between the carrying amount and the present value of the estimated cash flows discounted at the asset's original effective interest rate. The impairment loss is recognised in profit or loss.

If there is decrease in the impairment loss arising from an event occurring after the impairment was recognised, the impairment is reversed. The reversal is such that the current carrying amount does not exceed what the carrying amount would have been had the impairment not previously been recognised. The impairment reversal is recognised in profit or loss.

Financial assets are derecognised when (a) the contractual rights to the cash flows from the asset expire or are settled, or (b) substantially all the risks and rewards of the ownership of the asset are transferred to another party or (c) despite having retained some significant risks and rewards of ownership, control of the asset has been transferred to another party who has the practical ability to unilaterally sell the asset to an unrelated third party without imposing additional restrictions.

(ii) Financial liabilities

Basic financial liabilities, including trade and other payables, bank loans and overdrafts and amounts owed to related parties are initially recognised at transaction price, unless the arrangement constitutes a financing transaction, where the debt instrument is measured at the present value of the future receipts discounted at a market rate of interest. Debt instruments are subsequently carried at amortised cost, using the effective interest rate method. Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down.

**Brocagh and District Regeneration Group
(Charitable Company Limited by Guarantee)**

**NOTES TO THE FINANCIAL STATEMENTS (Continued)
For the year ended 31 October 2024**

2. ACCOUNTING POLICIES (Continued)

In this case, the fee is deferred until the draw-down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a pre-payment for liquidity services and amortised over the period of the facility to which it relates.

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Accounts payable are classified as current liabilities if payment is due within one year or less. If not, they are presented as non-current liabilities. Trade payables are recognised initially at transaction price and subsequently measured at amortised cost using the effective interest method.

(iii) Offsetting

Financial assets and liabilities are offset, and the net amounts presented in the financial statements when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis or to realise the asset and settle the liability simultaneously.

2.13 Critical Accounting Judgements and Estimation Uncertainty

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Critical judgements in applying the entity's accounting policies

There are no critical judgements in applying the charity's accounting policies.

Critical accounting estimates and assumptions

There are no actual accounting estimates and assumptions.

2.14 Finance Costs
